Comment:

Dear OEHHA People, I encourage you to allow NO Glyphosate in California. I strongly urge that the Prop 65 NSRL (No Significant Risk Level) for glyphosate be set at ZERO to protect the citizens of California. As a teacher who interacts with California's children daily, I am outraged that the glyphosate merchants have been allowed to sell this horrific product in our state willy-nilly for decades. Please set the NSRL for glyphosate at ZERO. Sincerely, Sandy Turner [REDACTED]
